Gynofit has been recommended by:

**Frequent questions asked about
Gynofit Vaginal Gels:**

What distinguishes Gynofit from other intimate products?

Antibiotics and antiseptics destroy all bacteria, even the beneficial ones. Antimycotics combat just the yeasts. Gynofit restores the entire vaginal climate to a natural, healthy equilibrium.

What do women value in particular about Gynofit?

With Gynofit they can control their vaginal well-being themselves, wherever life leads them. That relieves tension and prevents stress-related relapses.

What do gynaecologists think of Gynofit?

All gynaecologists who have tested Gynofit products in their patients are enthusiastic.

How does Gynofit Lactic Acid Vaginal Gel work?

Gynofit Lactic Acid Gel is made up of glycogen and lactic acid, which lower the pH value. So Gynofit provides the natural, slightly acidic pH value and thus restores the equilibrium of the vaginal flora.

How does Gynofit Moisturising Vaginal Gel work?

Gynofit Moisturising Gel is based on glycerin, which adheres to the vaginal mucous membranes and thus provides convenient moisturising.

How quickly do the Gynofit products work?

Gynofit Gels work very quickly. Relief and a subsiding of the symptoms are noticeable in part immediately, but at least 4-6 hours later.

Does Gynofit contain preservatives, fragrances and other irritants?

No. Gynofit is effective due to the harmonising action of natural lactic acid and glycerin.

The product that women trust.

The Gynofit Intimate Care Tips:

You can use Gynofit prophylactically for chronic, recurrent symptoms. The following tips will help you with your daily intimate care in a gentle and natural way:

- Use water and a mild, natural cleansing lotion designed for the intimate area.
- Avoid using soap and douches, for their alkaline pH value can damage the natural, protective vaginal acidity.
- Wear air-permeable clothing in order not to interfere with the necessary circulation of air. Underwear made from natural fibres is better than panties made of synthetic material.
- It is better to wash your intimate area with your hand rather than a washcloth. It is an ideal culture medium for bacteria. If you would prefer continuing to use a washcloth, use disposable washcloths or a new one daily.
- When cleaning yourself after a visit to the restroom, wipe from the vagina backwards, instead of in reverse. Otherwise your vaginal area will come in contact with intestinal bacteria.
- Eat food low in sugar, for too much sugar promotes an increase in yeasts and suppresses protective bacteria.

Vaginal problems?

Gynofit®

**relieves itching, burning,
ill-smelling discharge and
vaginal dryness.**

The gentle, simple and effective solution.

**Finally something
that really helps!**

NEW

Healthy and well intimately!

Does this sound familiar?

Itching, burning, discharge with a bad odour, swelling and pain in your most intimate are, the vagina? Hard to get rid of, and the symptoms recur again and again?
About 70 percent of all women suffer from it!

Preferably no medications

The symptoms are annoying and tedious, but not enough so that antibiotics, antifungal medications, etc. are necessary. You would also rather avoid that because of the side-effects and after-effects. Household remedies are difficult to use and doubtful as to their effect.

Everything normal again vaginally!

Gynofit was developed and tested together with gynaecologists. With the Gynofit Vaginal Gels you achieve quick and long-lasting control of the symptoms. Wherever you are, on trips, on holidays – you can immediately something yourself, and it works! That gives you confidence and a healthy feeling of well-being!

- In hygienic disposable applicators for insertion.
- No preservatives, no fragrances.
- Also suitable during pregnancy and while nursing.
- Individually packaged for protection from bacteria. Ideal also for en route.

With Gynofit you have the solution in hand!

Gynofit Lactic Acid Vaginal Gel

Causes for the itching, burning, foul-smelling discharge may be:
a visit to the swimming pool, antibiotic treatment, taking contraceptives, frequent vaginal infections, diabetes, stress, etc.

The solution is called Gynofit

- Simple and clean to use, wherever you are!
- Restores the vaginal flora to equilibrium.
- Regulates the pH value.
- Lactic acid base. Developed together with gynaecologists.

Available in 6 single-dose packages.

Gynofit for gentle, effective relief!

Gynofit Moisturising Vaginal Gel

Cause of vaginal dryness may be:
menopause, stress, childbirth, cancer therapy

The solution is called Gynofit

- Put an end to vaginal dryness (and thinner, more delicate, more vulnerable mucous membranes)
- Give the vagina back its healthy, defensive bacteria flora and protect then against itching and burning.
- Is optimally absorbed by the mucous membranes so none of the gel leaks.
- Suitable for long-term use.
- You feel naturally moist and good all over once again!

Available in 6 or 12 single-dose packages.

Gynofit – free of vaginal dryness forever!

Gynofit Cleansing Lotions

For daily intimate care, with or without vaginal problems, there is Gynofit, the mild scented or unscented Cleansing Lotion.

The solution is called Gynofit

- No soap.
- No preservatives.
- Contains chlorhexidine with antimicrobial action.
- With lactic acid.
- Supports the natural protective function of the intimate flora.
- Extra mild formulation.
- Gynofit Unscented Cleansing Lotion is also suited for irritated or sensitive skin.
- Supports the pH balance in the intimate area.

Available scented and unscented in 200 ml packages.

Gynofit - Cleansing Lotions for daily care!
